TVM TAPES are made of a special UV metalized polypropylene film, with a high tack acrylic adhesive. These tapes can help maintain a complete seal in radiant barrier systems, and are resistant to moisture, flame spread, and smoke generation. High temperature resistance, make **TVM TAPES** ideal for use in heat repelling applications.

TVM TAPES can be obtained with either a metalized aluminum surface, or a durable white poly surface. The acrylic adhesive was specially formulated for excellent performance at sub-freezing temperatures, without compromising ease of application.
